

# About Labrador

We enable Corporations to eliminate risk, and to reduce frustration and cost in the production of their regulatory compliance. Our modern, easy to use tools simplify the preparation of EDGAR and XBRL filings, whilst our proprietary, SEC approved layouts reduce pagination and please analysts and investors.

Labrador was created in 1992. We have offices in Atlanta, New York and Paris, and work with 90+ clients.

## Why we are different...

- We take the frustration and black-out periods out of XBRL - our easy to use platform means you make late changes, and file on-schedule.
- Our intuitive online corrections platform has consigned mark-ups, waits for changes and printer errors to the past. Save time and improve employee enthusiasm.
- Our SEC approved layouts reduce the pagination of your documents. With Labrador, Corporations make significant savings on production, print and fulfillment.
- Analysts and investors have expressed enthusiasm about our clear, easy to read documents.
- We guarantee that with Labrador, your Corporation will make savings of at least 10% on your legacy financial printer invoice.
